Plan Rail Combine of 19 Big Systems

(By U. S. Press)

Washington, Oct. 4.—A tentative plan for consolidation of all major American railroads into 19 great competing systems, has been announced by the Interstate Commerce Commission. The proposed combination, authorized under the transportation act, is designed to remove weaknesses in the national railroad system shown by the operation of the rate-making power of the Commission, and to effect readjustment of terminal and other subsidiary facilities with resultant economy in operation and delivery of shipments.

Hearings will be called soon by the Commission for the purpose of discussing the proposed consolidations. As the consolidation scheme is not mandatory, the probability of executing it is regarded as rather problematical. Under the law, no plan can be adopted, which has not received the approval of the individual lines affected, as well as that of the Commission. Because of this reason it is expected that discussion will be prolonged. The Commission in a statement says that it "sought to minimize dismemberment of existing lines and systems."
